Hudson Fiber Network Opens Two New Fast Paths Connecting Customers to Top Exchanges from Carteret, NJ

New Fiber Routes Provide Customers with Ultra-low Latency Metro Connectivity

PARAMUS, NJ – August 16, 2010 – Hudson Fiber Network (HFN), an exclusive provider of high-bandwidth, low-latency networking solutions, today announced that it has opened up two, ultra-low latency, metro New York Fast Path fiber routes. Combined with HFN's X-Change Connect Metro Ethernet solution, HFN will connect financial services customers to a highly desired financial exchange route in Carteret, NJ.

Because HFN continues to provide buy-side and sell-side customers and pre- and post-trade service providers ultra-low latency routes to the top exchanges in North America, these new Fast Paths connect 300 Boulevard East in Weehawken, NJ, 755 Secaucus Road (and 275 Hartz Way) in Secaucus, NJ to Carteret, NJ.

"HFN is committed to delivering customers the flexibility they need to reach the exchanges," said Keith Muller, CEO of HFN. "Because every customer is different, HFN delivers customized solutions. With these new Fast Paths, depending on a customer's needs, HFN can accommodate from 10 MB up to 40 Gig connectivity."

These metro-to-metro routes will also benefit from HFN's passive wavelength-routed, optical network in Carteret, NJ – cutting the need for additional equipment at the destination to further lower latency. Additionally, HFN's passive wavelength technology is offered in metro-to-metro areas across North America connecting customers to the top exchanges in New York, Chicago and Toronto.

About Hudson Fiber Network

Headquartered in Paramus, NJ, Hudson Fiber Network is an exclusive telecom provider of high-bandwidth, low-latency networking solutions for financial, content, carrier and enterprise customers. Established in 2002, Hudson Fiber Network has quickly become a premier Ethernet data provider in the U.S. offering clients' solutions that increase network efficiency; help them manage a multi-carrier environment and lower overall networking expenditures.

The company operates a fiber network, which delivers key IP and network services in and among the top U.S. metro markets and around the globe. With more than 25 years of combined experience in the telecommunications industry, the company offers scalability and global reach through its suite of services including basic Internet connectivity (T1 through 100 Gig), Gigabit Ethernet and Wave networks.
