### **Hudson Fiber Network Moves into Toronto**

*Expansion Offers Low-Latency Connections to Canada's Top Financial Exchanges*

**PARAMUS, N.J. – February 22, 2010** – Hudson Fiber Network, an exclusive provider of high-bandwidth, low-latency networking solutions has announced its continued growth into two premier locations in Toronto: 151 Front and 100 Wellington Streets, which will feature its X-Change Connect solution providing speeds from 10M to 40G — connecting customers to the leading financial markets in New York, Chicago and New Jersey with the lowest latency routes.

As part of its Metro Ethernet offering, Hudson Fiber Network's X-Change Connect offers financial services companies the lowest levels of latency across the shortest distance fiber routes. Its guaranteed, microsecond Service Level Agreements (SLAs) enable customers to provide a single point of connectivity with unmatched performance for trading firms in the equity markets. Due to its strategic partnerships with top colocation providers, Hudson Fiber Network's X-Change Connect is being deployed to the major metropolitan exchanges throughout North America.

"We understand our customers' need for instantaneous, uninterrupted information — a competitive advantage in today's trading market," said Brett Diamond, President, Hudson Fiber Network. "In addition to low latency, financial services customers are seeking global reach to the top financial markets. Our expansion into Toronto allows customers to connect to the major exchanges in New York, New Jersey, Chicago, London and Asia."

### **About Hudson Fiber Network**

Headquartered in Paramus, N.J., Hudson Fiber Network is an exclusive telecom provider of high-bandwidth, low-latency networking solutions for financial, content, carrier and enterprise customers. Established in 2002, Hudson Fiber Network has quickly become a premier Ethernet data provider in the U.S. offering clients' solutions that increase network efficiency; help them manage a multi-carrier environment and lower overall networking expenditures.

The company owns its fiber network, which delivers key IP and network services in and among the top U.S. metro markets and around the globe. With more than 25 years of combined experience in the telecommunications industry, the company offers scalability and global reach through its suite of services including basic Internet connectivity (T1 through 100 Gig), Gigabit Ethernet and Wave networks.
